Trade Style Canopy CROSS BARS

Following the launch of the Trade Style Canopies, Ironman 4x4 has been working hard to create a roof cross bar system that is designed for and suits the Vinyl Ester Fibreglass canopies.

Stylish and practical in design, the black powdercoated cross bar has a non-slip rubber strip that runs the entire length of the bar. This assists with maintaining your load stays secured. Heavy duty moulded feet supplied with the cross bars are purpose made to suit the built-in Trade Style Canopy alloy extrusion rails.

These durable and strong feet come supplied as part of a kit along with the aluminium Cross Bars. Extrusion rails can be purchased separately in a range of three sizes; 945mm, 985mm and 1085mm to suit a range of other vehicle applications.

RRP

CROSS BAR AND FEET - IRRCROSSBAR001

\$220
